Engineer delivers business, STEM lecture

PENNINGTON, N.J., December 8--- Scott Gibbard of Yardley, Pa., delivered a lecture on the intersection of business and STEM (Science, Technology, Engineering and Mathematics) to students at The Pennington School on Friday, December 8. The lecture, held in the Wesley Forum, was aimed especially at juniors and seniors in the School's Applied Science Certificate Program.

Gibbard has an engineering degree in Engineering Physics from the University of Toronto, a Masters in Science in Aerospace Engineering from the Institute for Aerospace Studies, and a M.B.A (Master of Business Administration) from Cornell University. He has split his 25-year career almost evenly across three different areas: as an aerospace engineer, a pharmaceutical R&D executive, and a management consultant. Gibbard is the father of two current Pennington students.

The common theme of his talk was that he has always worked directly on, or as an advisor to, product development in science/engineering-based industries**.**

The Pennington School is an independent coeducational school for students in grades 6 through 12, in both day and boarding programs. The curriculum is college preparatory, with an emphasis on individual excellence, fostering the development of the whole student through academics, athletics, community service, and the creative and performing arts. For more information about the School, please visit our website at www.pennington.org.
